

ILumeStar™ MR-16 LED

(Patented)

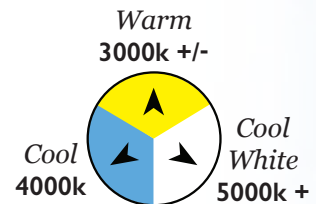

MR 16 LED Lighting - Down Lights and Fixtures

Conjoined Lens Down Lights | External Driver Down Lights | Step Down Lights

O'Ryan LED down lights are the best solution and alternative to traditional down lighting and fit into all standard sized canned light fixtures. One 5 Watt LED Down Light replaces a 50 Watt Halogen Down Light and cuts power consumption by 90%.

- >> Available in 3W, 4W, 5W, 6W, 7W bulbs and more
- >> 100-150 Lumens Per Watt on average
- >> Standard fixture colors: Black or White
- >> Custom colors available to match ceiling (additional charge)
- >> Samples are available with a \$100 minimum purchase.
- >> 5yr. Standard Warranty and 10 Yr. Extended Warranty Available
- >> Ask about our FREE Power Audit to evaluate and maximize monthly savings!
- >> 4", 6" & 8" LED Retrofit kits with dimmers are available for power supply replacement

All lights are available
in W | C | CW Colors

PROBLEM

- Halogen lights are fire hazards because they operate at very high temperatures and cause the fixture, electrical wiring, insulation and surfaces in close contact to break down.
- Traditional light fixtures are constructed in metal. High heat breaks down the metal. Combined with moisture that naturally occurs, the heat causes rust rings and discoloration on the ceiling.

SOLUTION

- O'Ryan's MR 16 LED Lights deliver cool light and eliminates the fire hazards associated with hot, Halogen lighting.
- O'Ryan's MR 16 Fixture is manufactured in highly durable, long-lasting poly-carbonate. Fixtures are designed with a slightly larger flange to cover all existing rust spots and discoloration due to failing metal fixtures.
